

## TITO Slot Machine Ticket Design Template

For Cummins Allison Bill Sorters

Cummins Allison and Graphic Controls continue to work collaboratively as the world's premier ticket and equipment providers.

When using CA Bill Sorters and other scanning equipment, consideration to the following specification is advisable. Please note that item 1.0 in both figures below represents 'clear zones' on the non-thermal side. These clear zones are to be free of graphics and color, excluding black text 10pt. or less.

### Outer Band Clear Zones

#### Cummins Allison MPS Models:

- MPS 4100 – US & countries with US Currency
- MPS 4200 – Canada

#### JetScan 2 pocket model:

- JetScan 4091 (USD Currency)

**Please select all Cummins Allison equipment models from the lists above that apply to your gaming floor(s).**

In the event your property/properties utilize equipment from the inner and outer band models, both specifications will apply when designing non-thermal TITO Ticket artwork.

It is the casino's responsibility to ensure this list is managed directly with your Graphic Controls Sales Manager to always ensure functional product on your gaming floor.

This guide is for information purposes only and represents Graphic Controls understanding of CA models that may need to utilize custom design specifications to ensure ticket readability.

Graphic Controls is held harmless for any failures that may result from the use or deviation from these guidelines. Please consult with all equipment manufacturer's for bill sorters, bill validators, printers and other scanning and count system equipment to ensure operational efficiency and compliance to any product specification(s).

Note: Drawings are not to scale.

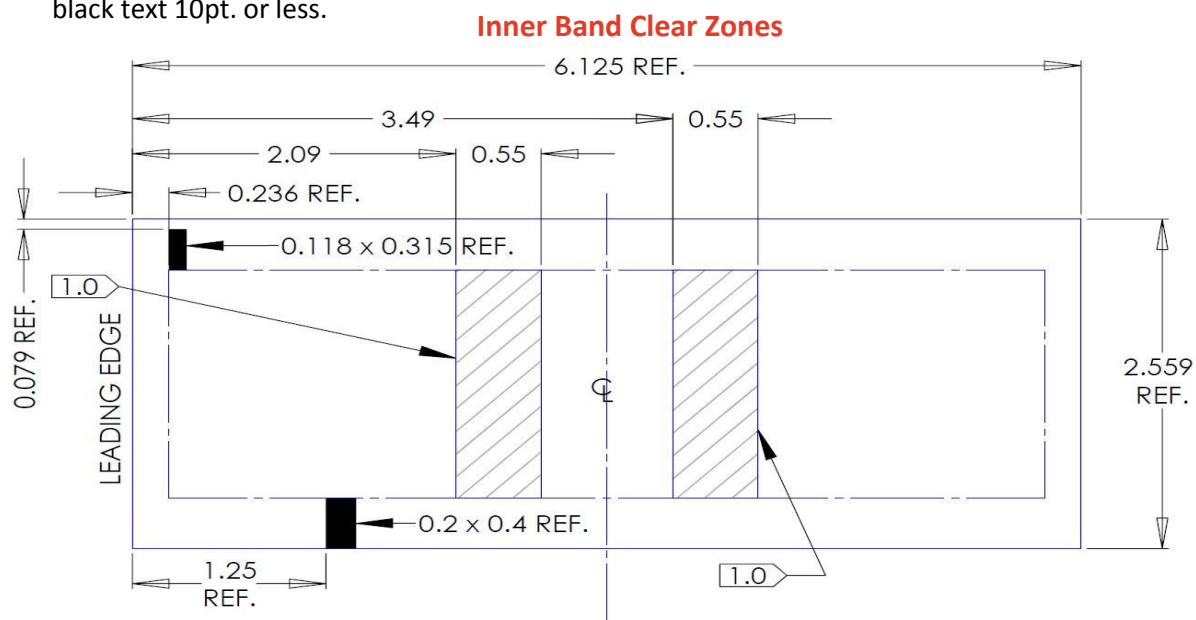

Please visit [GraphicControls.com/Design](http://GraphicControls.com/Design) for adobe design templates.
