

Q-BLOCK SPECIFICATIONS

Every IGT approved ticket must have a black pre-printed Q-Block index on the Non-Thermal side. The ticket must conform to the following outline dimensions and properties. Ticket Cut may not exceed 0.060mm of white space between the Q-Block and ticket edge.

Due to strict IGT requirements our cut will vary within .060mm from the Q-Block this will sometimes show a bleeding edge and other times not. The variation will change depending on print run.
